

AI BENCH

AI Interview Coach

DEVELOPED BY

THE STAR ARCHITECT

Srishti, Prachi

MY ROLE

- Streamlit UI
 - CSS
 - Notes & Notes summarizer
 - Fronted developer
-

Interview prep is scattered, and and unstructured.

- 01 Students juggle generic question banks with no real feedback loop.
- 02 One-on-one coaching averages \$200/hour — out of reach for mos.
- 03 Existing tools replay static questions and never adapt to live answers.

WHY STUDENTS STRUGGLE

Top three pain points reported.

Source: Internal student survey, n=120.

SOLUTION & FEATURES

nine pages. One adaptive coach.

- 01 Streamlit workspace with 9 pages covering the full prep lifecycle.
- 02 AI builds adaptive mock interviews from any topic, level, or difficulty.
- 03 Voice + text input, real-time scoring, and private notes build in

 Voice input

 Adaptive AI

 Real-time scoring

 Private notes

PAGE BREAKDOWN BY CATEGORY

Nine pages, four functional groups.

● Practice & AI	4 pages
● Dashboard	3 pages
● Notes	1 page
● Interview Coach	1 page

Built on Streamlit, Python, and Gemini.

- 01** Frontend: Streamlit with custom glassmorphism CSS components.
- 02** Backend: Python module with Gemini API for AI orchestration.
- 03** Database: Custom Python module — no external DB server needed

STACK COMPOSITION

Code distribution by module.

TOTAL STACK WEIGHT

100%

Approximate code distribution by module.

END-TO-END ARCHITECTURE

A four-layer Streamlit pipeline.

- 01** Streamlit UI renders 8 pages and captures voice + text input.
- 02** Backend module orchestrates Gemini for adaptive questions and scoring..
- Q3** Database module persists users, results, notes, and full transcripts.

DATA FLOW

Four layers, one pipeline.

LIVE APPLICATION

Try AI-bench live.

Login with guest credentials and start an interview on any topic.

Watch the AI adapt questions based on your live answers.

Get real-time feedback and a 0–10 score after every response.

DEPLOYMENT URL

<http://localhost:8502->

DEPLOY READINESS

✓ Push to GitHub

✓ Open Streamlit Cloud

✓ Connect repo

✓ Click Deploy

*Live link generates in ~2 minutes after deploy.
deploy.*

MY CONTRIBUTION BREAKDOWN

MY ROLE & OWNERSHIP

Frontend ownership across the platform.

Built all 8 Streamlit pages — Home, Interview, Results, Notes, AI Coach.
Authored glassmorphism CSS: glass_card, metric_card, stat_strip, feedback.

Implemented voice input + TTS question reader + 5-min autorefresh

●	Page UI	50%
●	Components + CSS	30%
●	Notes and Notes summarizer	20%

AI COMPONENT

Two AI pillars power the coach.

`generate_interview()` builds the question set from topic + level.
`generate_next_question()` adapts the next prompt to the last answer.
`answer.`
`evaluate_answer()` + `score_from_feedback()` deliver instant 0–10 scoring.

ABOUT AI-BENCH

A student-first interview practice workspace.

9-page Streamlit workspace covering prep, practice, and tracking.

4 experience levels × 4 difficulty modes = 16 calibration combinations.

AI Coach reads PDFs, images, and TXT files for contextual coaching.

It also helps in making Notes & also Helps in brief.

CALIBRATION MATRIX

	ADAPTIVE	EASY	MEDIUM	HARD
Student				
Beginner				
Intermediate				
Advanced				

 Recommended start  Standard  Advanced

16 combinations. AI calibrates per user.

FUTURE IMPROVEMENTS

Roadmap for the next three quarters..

Q1: Improve App Performance

Make AI responses faster.

Reduce unnecessary processing

Q2: Improve Security & Deployment

Make user login more secure.

Deploy the app on Streamlit Cloud.

Q3: Add Performance Reports

Add student performance tracking.

Allow users to download performance reports
